

2022 Casino Bull Sale

Ramsey & Bulmer Casino Bull Sale Friday 24th June 2022

Lot 6 [Thornleigh R388 \(HPR\) \(H#\)](#)

This is a high muscle content bull by Lotus Legion – a really wide topped bull with lovely conformation. His mother is a big square made, roomy cow who has produced a really top Black Hawk bull calf again this year. R388 has a very quiet disposition and is beautifully balanced. He scanned 5.7% for marbling in March and will produce high carcase value progeny.

Lot 7 [Thornleigh R230 \(AI\) \(H\)](#)

R230 is a really soft, fleshy Cara Park Unique son. He has a real sire's head with exceptional hooding and trouble-free eye set. With extra spring of rib and depth of body, an outstanding 6.4% marbling scan, and ideal fat to muscle ratio, R230 will produce easy finishing, high constitution progeny – high performing steers and efficient producing females you can rely on.

Lot 8 [Thornleigh Legume R221 \(AI\) \(HPR\) \(H#\)](#)

Legume R221 is by our home-bred 2017 Brisbane Grand Champion – L371. L371 has proven himself to be a very consistent short gestation sire, ensuring calving ease. Legume R221 is a big stretchy bull with a great skin and slick hair type. He is structurally hard to fault as is his top quality mum – J283. Heavily pigmented and short marked, he would cross well with any breed of female. He was our highest scanning EMA bull and with a raw marbling scan of 6.4%, he promises high carcase merit.

Lot 9 [Thornleigh Rotor R337 \(H\)](#)

Rotor R337 is another Cara Park Unique son oozing quality. He has tremendous softness with a short, smooth hair type, well laid in shoulder and a very desirable head and eye set. He will be ideal for use on heifers but will pass enough growth to his progeny and with a 5.8% raw marbling and good external fat to muscle ratio, carcase quality will be ideal.

Lot 24 [Thornleigh R390 \(HPR\) \(H#\)](#)

R390 is a big robust Lotus Legion son – he has as much natural muscle expression as any in our draft, with great spring over his rib. He had the second highest raw Eye Muscle Area when scanned in March with ideal fat cover and a very solid 5.2% for marbling. Like all the Legion progeny, he is full of performance.

Lot 25 [Thornleigh R256 \(HPR\) \(H#\)](#)

R256 is another of the terrific Lotus Legion sons. He has muscle to burn and extra length of body so he will always produce calves that will be heavy on the scales. He is a higher yielding type bull but still registered a commendable 5.2% marbling score. His great set of EBVs tell an accurate story. He has a really nice mother in M245, who has a sensational Black Hawk heifer calf at foot at the moment.

Lot 26 [Thornleigh Romney R346 \(TW\) \(H\)](#)

Romney R346 was from one of our really good producing females D195, who never had an ordinary calf. A Cara Park Unique son, R346 is a higher yielding shape going back to Ribstone 83S, but still would be able to do reliable service on heifers. He has the desirable high muscle, high fat combination and scanned a tremendous 6.0% for marbling – you can buy this bull with confidence.

Lot 27 [Thornleigh Rhinestone R382 \(H#\)](#)

Gives away a few months in age but nothing in quality – R382 is a really soft, easy fleshed Cara Park Unique son with a beautifully hooded eye set. He will produce cattle that will mature easily with ideal carcase attributes having had a raw marbling scan of 5.9% and ideal fat to muscle ratio. An ideal option for those looking for the F1 replacement producer.
